Black Rubber

Terra-Cotta Nitrile

Did You Know?

- AN EFFECTIVE MATTING SYSTEM CAN REDUCE 80% OF OUTDOOR SOILS
Matting is so effective at keeping moisture and soil outside that it is required to be installed at all LEED certified Buildings.
- MATS SHOULD BE VACUUMED REGULARLY, PREFERABLY WITH AN UPRIGHT VACUUM CLEANER AND IN DIFFERENT DIRECTIONS
The roller brush on an upright agitates the mat's fibers, helping release soils in the mat.
- AN EFFECTIVE MATTING SYSTEM CONTAINS AN OUTSIDE SCRAPER MAT AND INDOOR WIPER/SCRAPER MAT
